

Instrument Panel Cluster (IPC)

Special Tool(s) / General Equipment

Interior Trim Remover

Removal

NOTE: Removal steps in this procedure may contain installation details.

NOTE: Right hand drive (RHD) shown, Left hand drive (LHD) similar.

1. **NOTE:** If installing a new module, it is necessary to upload the module configuration information to the scan tool prior to removing the module. This information must be downloaded into the new module after installation.

Using a diagnostic scan tool, begin the PMI process for the IPC following the on-screen instructions. Record the odometer value from the original IPC . If the odometer value cannot be obtained from the IPC (display failure), perform the diagnostic routine. If the value cannot be obtained after the diagnostic routine, the customer should supply the approximate odometer value.

2. Fully extend and lower the steering column.

3. Position the weather strip aside.

4. Release the clips and remove the end cover trim panel.
Use the General Equipment: Interior Trim Remover

5. Release the tabs, clips and remove the gap hider from the upper steering column shroud.
